

Responsive Webpage with CSS Media Queries

■ Project Description

A responsive webpage that adapts its layout, fonts, and images for mobile, tablet, and desktop devices using CSS media queries.

■ Objective

Convert a desktop-only webpage into a mobile-friendly layout.

■ Tools Used

- HTML5
- CSS3
- Chrome DevTools (for testing)
- VS Code (for development)

■ Features

- Flexible two-column desktop layout
- Stacked single-column mobile layout
- Responsive navigation menu
- Images scale to fit container
- No horizontal scroll on small devices

■ How to Run

1. Clone or download this project.
2. Open the index.html file in your browser.
3. Use Chrome DevTools (F12) to test in different viewports.

■ Responsive Breakpoint

```
@media (max-width: 768px) { ... }
```
